

# Emergency instructions for replacement Santa

Are you concerned that Santa is going to feel ill? Are all the children going to wake up on Christmas morning feeling a lump of despair? Would you want to help with operation Christmas? Do not be threatened about this important job. These instructions will help you be Santa. Read on and you will become a professional Santa.

## What you will need

- A working sleigh (how else would you carry all the presents?)
- 7 reindeer (if you didn't have these magical creatures you would fall from a very tall height).
- Sandwich and a cup of tea (wouldn't you want to relax?)
- The golden key (what if they didn't have a chimney, how would you get in?)
- Sack of presents (WARNING: DON'T DROP THEM. THEY ARE VERY HEAVY)
- Map
- Present list (you might give the wrong presents to the children).

## What you need to do

Firstly, feed the 7 reindeer

Then pack the presents, your sandwich and cup of tea, torch, the golden key and the list of course.

Make sure the reindeer goes to the toilet as well as you.

Next, climb onto the sleigh and hold onto the reins. Shout "GO!" for the reindeers to fly into the air. Quickly, hold and tight as you will fly off quick.

When you have reached you're your first destination climb into the chimney. If there is no chimney then you will have to use your golden key to get in. Quietly, go in and put their Christmas present (using your list) under the Christmas tree. You will have to do this as quiet as a mouse or one of the children or parent will wake up and capture you red handed. As well as this, they might find out the secret identities of Santa, that's you (59% of that not happening).

When you have done that, quickly go back outside (no running) and check your list for the next child (or maybe adult) you have to go to next. Before you do this, check your sleigh is in a safe place (more like a secret place). Repeat this for half of the world.

After you have done half of the world, eat your healthy sandwich an drink you nice cup of tea.

When you have done the next half of the world, fly back to the North Pole (don't fall off because of all the mince pies you ate) and carefully park your sleigh in a safe place.
